

1000mm Draw Wire Measurement

Make linear measurement easier

Features and applications:

- Measuring range is from 0...1000mm, the universal output signal can be selected, and it can be assembled by yourself
- Digital output and analog signal output, incremental encoder or absolute value encoder can be selected.
- Aluminum alloy material, precision spiral lifting, automatic wiring, the same range per turn, high repeat-ability.
- Small mounting space, high measurement accuracy, high reliability, long service life, low maintenance and easy mounting
- Faster velocity , it is available to have a secondary instrument or PLC control system, etc., to monitor the displacement data more intuitively.
- Protection class can be up to IP65, and working temperature can reach -45°C...+105°C, perfectly applied to size measurement and position measurement in any field.

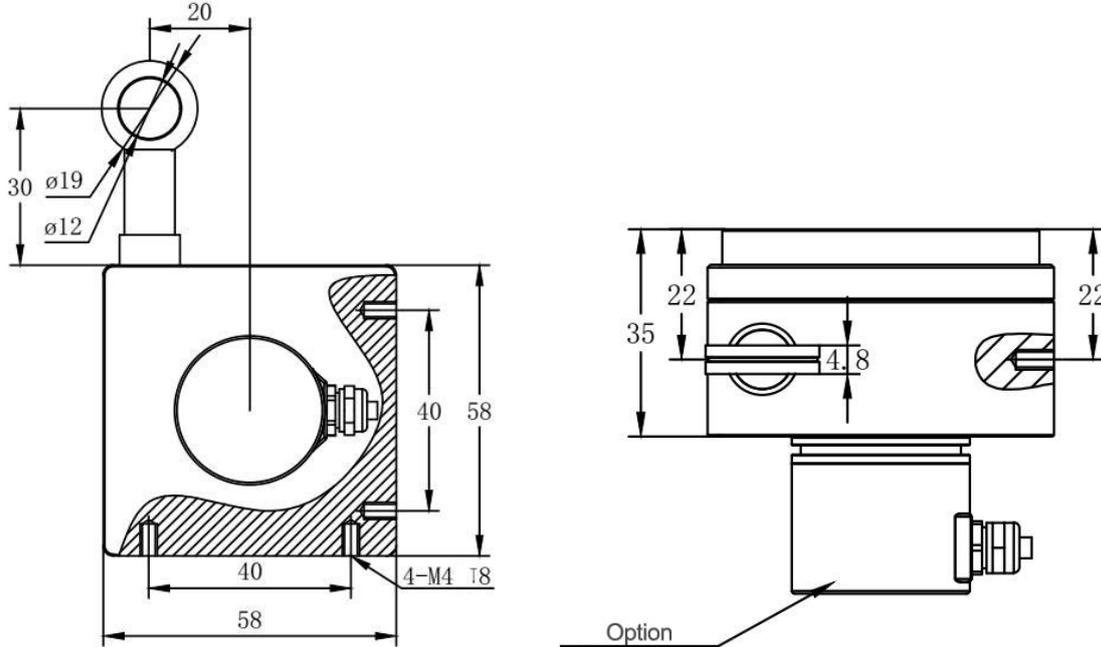

Model	SELS125-1M
Measuring range	1000mm
Limit range	1500mm
Single turn length	125mm
Cable diameter	0.6mm or 0.8mm
Tension range	5-15N
Measuring accuracy	±0.05%
Max. Velocity	4m/s
Body material	Aluminum alloy
Cable material	316L stainless steel plastic coating
Operating temperature	-45°C.....+105°C
Protection class	IP54/IP65
Life time	5 million times
Optional signal for absolute value encoder	
Output signal	4-20mA, 0-5V, 0-10V, 0-20mA, SSI, Parallel, RS485, MODBUS-RTU, Profibus-DP, CANopen
Operating voltage	10....30VDC or 5VDC (reverse polarity protection, over-voltage protection)
Signal adjustment	Corresponding value of each turn / Direction/ Preset position/ External zero position/ Total range adjustable,
Protection class	IP65 (Shell IP67 Axle IP65)
Incremental encoder	
Output mode	HTL/push-pull output, TTL/RS422, voltage output, current output
Output signal	A B , A B Z or A B Z + A/ B/ Z/
Operating voltage	5±0.25 VDC or 10....30VDC
Number of pulse	1~5000 pulses

Connection

Shielded cable or aviation plug

Dimension Drawing:

2000mm Draw Wire Measurement

Make linear measurement easier

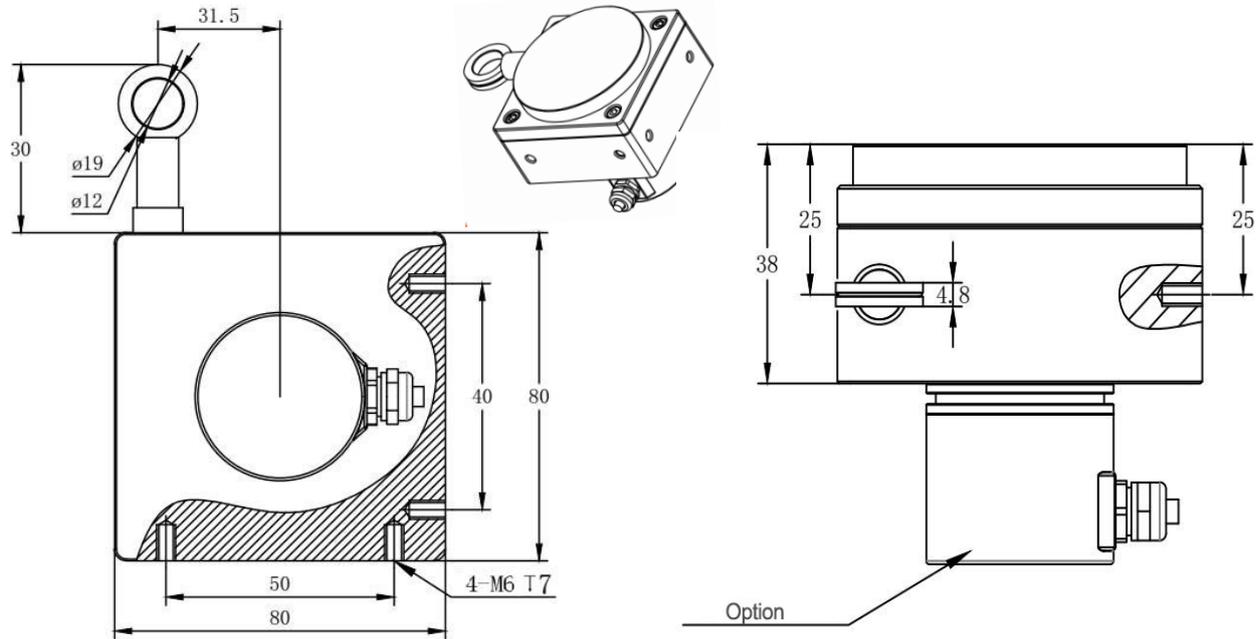

Features and applications:

- Measuring range is from 0...2000mm, the universal output signal can be selected, and it can be assembled by yourself
- Digital output and analog signal output, incremental encoder or absolute value encoder can be selected
- Aluminum alloy material, precision spiral lifting, automatic wiring, the same range per turn, high repeat-ability
- Small mounting space, high measurement accuracy, high reliability, long service life, low maintenance and easy mounting
- Faster velocity , it is available to have a secondary instrument or PLC control system, etc., to monitor the displacement data more intuitively.
- Protection class can be up to IP65, and working temperature can reach -45°C...+105°C, perfectly applied to size measurement and position measurement in any field.

Model	SELS200-2M
Measuring range	2000mm
Limit range	2200mm
Single turn length	200mm
Cable diameter	0.6mm、 0.8mm、 1.0mm
Tension range	5-15N
Measuring accuracy	±0.05%
Measuring speed	4m/s
Body material	Aluminum alloy
Cable material	316Lstainless steel plastic coating
Operating temperature	-45°C.....+105°C
Protection class	IP54/IP65
Life Time	5 million times
Optional signal for absolute value encoder	
Output signal	4-20mA, 0-5V, 0-10V, 0-20mA, SSI, Parallel, RS485, MODBUS-RTU, Profibus-DP, CANopen
Operating voltage	10....30VDC or 5VDC (reverse polarity protection, over-voltage protection)
Signal adjustment	Corresponding value of each turn / Direction/ Preset position/ External zero position/ Total range adjustable,
Protection class	IP65 (Shell IP67 Axle IP65)
Incremental encoder	
Output mode	HTL/push-pull output, TTL/RS422, voltage output, current output
Output signal	A B , A B Z or A B Z + A/ B/ Z/
Operating voltage	5±0.25 VDC or 10....30VDC
Number of pulse	1~5000
Connection	Shielded cable or aviation plug

4000mm Draw Wire Measurement

Make linear measurement easier

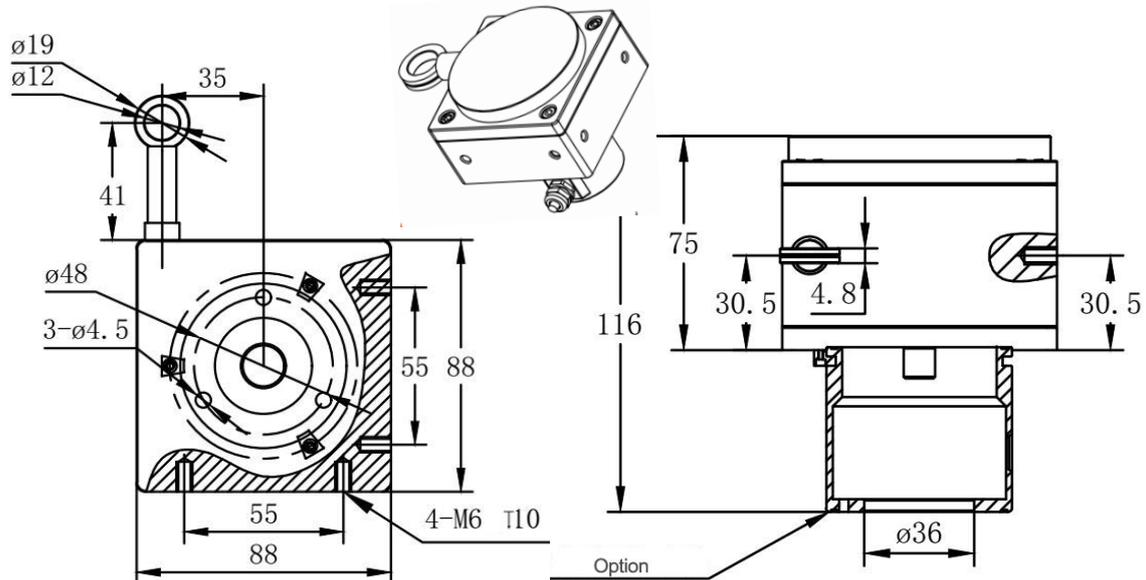

Features and applications:

- Measuring range is from 0...4000mm, the universal output signal can be selected, and it can be assembled by yourself
- Digital output and analog signal output, incremental encoder or absolute value encoder can be selected
- Aluminum alloy material, precision spiral lifting, automatic wiring, the same range per turn, high repeat-ability
- Small mounting space, high measurement accuracy, high reliability, long service life, low maintenance and easy mounting

6000mm Draw Wire Measurement

Make linear measurement easier

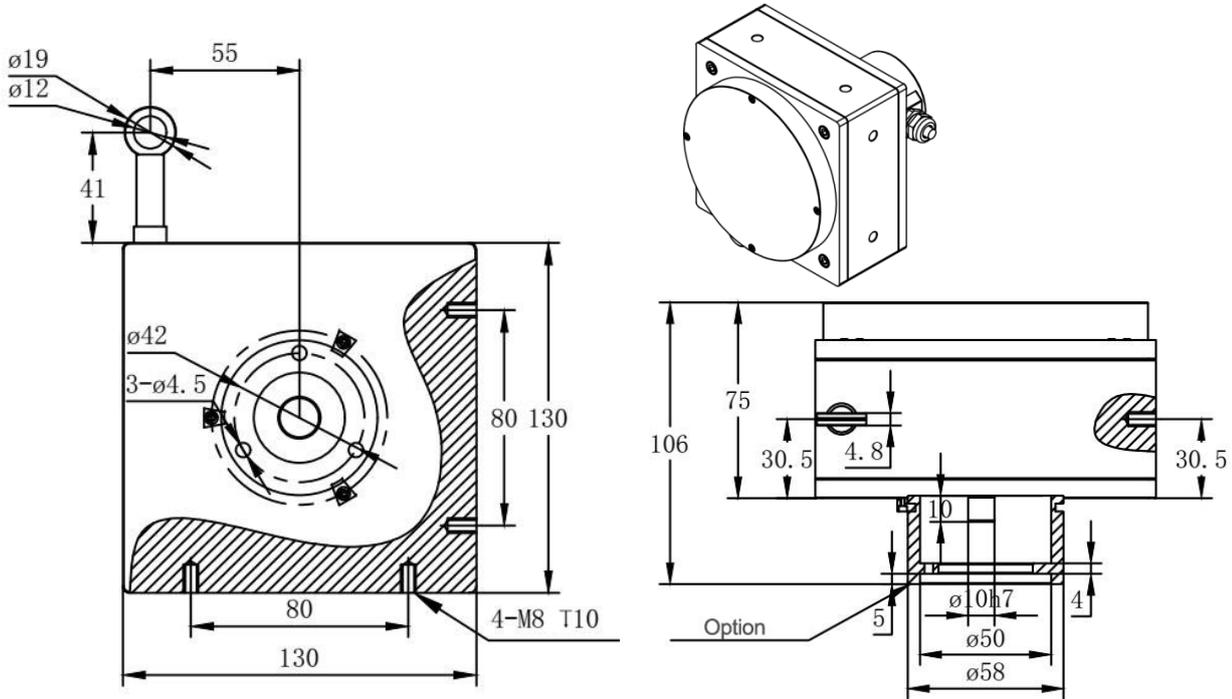

Features and applications:

- Measuring range is from 0...6000mm, the universal output signal can be selected, and it can be assembled by yourself
- Digital output and analog signal output, incremental encoder or absolute value encoder can be selected
- Aluminum alloy material, precision spiral lifting, automatic wiring, the same range per turn, high repeat-ability
- Small mounting space, high measurement accuracy, high reliability, long service life, low maintenance and easy mounting
- Faster velocity, it is available to have a secondary instrument or PLC control system, etc., to monitor the displacement data more intuitively.
- Protection class can be up to IP65, and working temperature can reach -45°C...+105°C, perfectly applied to size measurement and position measurement in any field.

Model	SELS348-5M	SELS348-6M
Measuring range	5000mm	6000mm
Limit range	5300mm	6200mm
Single turn length	348.7mm	348.1mm
Cable diameter	1.0mm	0.81mm
Tension range	10-21N	
Measuring accuracy	±0.05%	
Measuring speed	4m/s	
Body material	Aluminum alloy	
Cable material	316Lstainless steel plastic coating	
Operating temperature	-45°C.....+105°C
